# The Shower Shelf

Instruction Manua

# The Shower Shelf - Instruction Manual

## **Instructions**

- 1. This product should be installed in a corner of a room
- 2. Mark out fixing locations on surface
- 3. Drill suitable holes depending on wall fixings (Not supplied)
- 4. If installed in a wet environment, silicone may be applied around the mounting holes to prevent water ingress
- 5. Ensure the product is safe for use after fixing to the wall.

# General safety warning:

Please ensure these instructions are fully read and implemented. Failure to do so may result in injury to the user. Retain in a safe place for future reference. The product must be installed by a competent professional onto a surface that is deemed suitable.

Should you see any damage during unpacking or suspect a fault, do not install the product and contact your supplier immediately.

Products have been tested to a load of 160kg for 60 seconds in accordance with BS ISO 17966:2016 on a suitable surface.

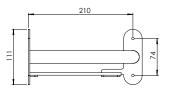

# Disclaimers, Installation and further safety information:

- 1. This product must be correctly assembled, installed, and maintained.
- If installing the product in a showering or bathing area it may need to be earthed to conform with IEE Wiring regulations for metallic components within bathrooms. Consult a suitably qualified person prior to installation.
- 3. Support rails can be slippery when wet use this product with caution.
- 4. It is recommended that this product is installed by a suitably qualified, competent person.
- Only install the product in an area where the mounting surface is structurally sound. (Strengthening modifications to the fixing surface may be required.)
- 6. This product must be secured to the wall using fasteners which are appropriate to the structural base material.
- 7. Any screw caps that are used must be securely fixed so that they cannot be removed during normal usage.
- 8. Waterproofing is recommended and all fixings used should be none rusting. Sealant should be applied around the wall contact points for any products mounted in a shower. If not properly sealed, there is the potential for water ingress. This may cause the wood to rot, compromising the structure and safety of the support rail.
- DO NOT install in fibreglass / acrylic shower enclosures with insufficient stiffness and strength. The maximum rated load of this product is 100kg based on the product being fitted to a suitable surface using appropriate fixings in accordance with BS ISO 17966:2016.
