Wooden Slatted Shower Seat Instruction Manual

General safety warning:

Please ensure these instructions are fully read and implemented. Failure to do so may result in injury to the user. Retain in a safe place for future reference. The product must be installed by a competent professional onto a surface that is deemed suitable.

Should you see any damage during unpacking or suspect a fault, do not install the product and contact your supplier immediately.

Products have been tested to a load of 160kg for 60 seconds if installed on a suitable surface in accordance with BS ISO 17966:2016.

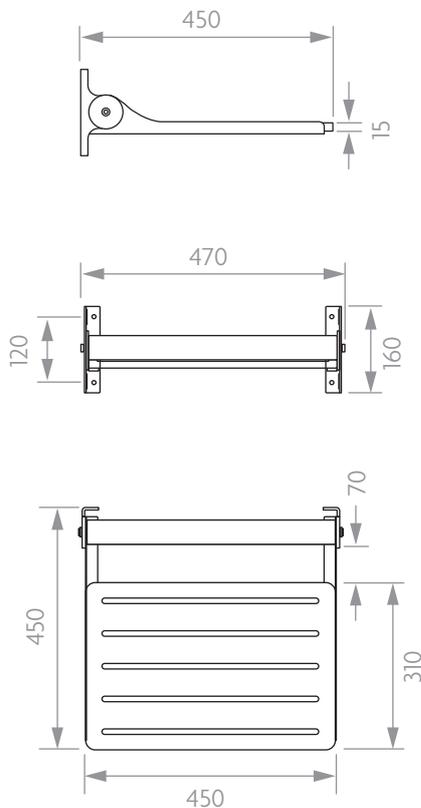

Maintenance:

The slats are solid Teak wood - a tropical hardwood that is naturally water repellent. It has a heavy oil content and has also been treated with Teak oil. Over time it will change colour as it is a natural material, but applying a treatment of Teak oil will restore its original colour.

Disclaimers, Installation and further safety information:

1. This product must be correctly assembled, installed, and maintained.
2. Support rails can be slippery when wet – use this product with caution.
3. It is recommended that this product is installed by a suitably qualified, competent person.
4. Only install the product in an area where the mounting surface is structurally sound. (Strengthening modifications to the fixing surface may be required.)
5. This product must be secured to the wall using fasteners which are appropriate to the structural base material.
6. Any screw caps that are used must be securely fixed so that they cannot be removed during normal usage.

Simplified product dimensions

Key product points
